The Curries Missile Level E (80 feet per second impact) hurricane resistant assembly offers enhanced protection to essential facilities including hospitals, police stations, emergency shelters, communication centers and other facilities required for emergency response. The assembly is designed to meet High Velocity Hurricane Zone (HVHZ) requirements to protect occupants and property against large projectiles (9 lb 2x4 at 80 fps). Heavy duty anchoring, steel reinforcing and hardware components firmly secure the CURRIES hurricane assembly within the frame.

The Curries Missile Level E assembly has been third party classified by Underwriters Laboratories (UL) for compliance with the 2006, 2009, 2012 and 2015 International Building Code to ASTM E330, ASTM E1886, ASTM E1996 as well as TAS 201 / 202/ 203 standards. Maximum design pressure is +/- 150 psf.

CURRIES continues to be the leader in providing windstorm solutions designed to help protect property and lives.
