

## Revolutionary High Performance Shock Absorbing Concrete (HPSAC)

### Technical Data

Made from Amidon Shield (HPSAC), and capable of being mixed on site by any qualified technician, this product is well suited for structural uses, walls and other items such as barriers. This mix design can range between 3,000 and 4,500psi as needed and maintain its ballistic properties.

Our proprietary mixture is shipped pre-measured from our manufacturing facility in North Carolina.

Simply follow the directions regarding how to mix our additives to your existing Portland Cement and
